FIFTY VARIETIES

{Old Standbys

To Bloom in your Garden

{With all Costs o

AURATUM PLATYPHYLLUM (Gold Band)—This is a beautiful lily, and I'm glad I can offer you these home grown bulbs. This variety is the easiest one of the Auratums to grow—a face of pure white with a central band of gold on each petal, and sweetly fragrant. Plant it 10 inches deep in an acid soil, well drained, rich with leafmold, plenty of water during growing season, and under favorable conditions it will attain a height of 8 to 10 ft. Blossoms in August. (See back cover.)

	Each	6	12	25	50	100
7-8 in. cir.	\$.50	\$2.60	\$5.00	\$9.85	\$19.50	\$37.95
8-9 in. cir.75	3.90	7.50	14.50	28.00	53.00
9-10 in. cir.	1.00	5.50	10.00	19.00	36.25	69.50

AMABILE—This lily is **early blooming**, and for that reason alone is quite valuable for your garden. It is a splendid rock garden lily or for low group planting. Its blossoms are waxy, bright orange scarlet. Height 1 to 2 ft. Blooms early June. Plant 4 inches deep in an open sunny location.

	6	12	25	50	100
Medium size bulbs.....	\$1.25	\$2.35	\$4.50	\$ 8.50	\$16.15
Large bulbs	1.75	3.35	6.45	12.50	24.20

AMABILE, variety LUTEUM—A rare form of the Amabile lily, with attractive clear orange-yellow flowers. Same culture as the Amabile. These two lilies together make quite a showing. (Limited supply.)

Each	6	12	25
\$.60	\$3.40	\$6.00	\$11.50

BROWNI—This is a wonderful lily. It is the true Browni, has a trumpet shaped blossom, marble white with emerald green throat, brown anthers, and so transparent in the sunshine that the purple of the reverse side blends beautifully with the green and brown tones of the inner surface. Height 2 ft. Blooms July. Plant 8 inches deep and lay bulb on its side. (Limited supply.) Each \$2.00, 3 bulbs \$5.50, 6 bulbs \$10.00

BROWNI colchesteri—This lily somewhat resembles the True Browni, except that its fragrance is that of the cape jasmine, or gardenia. The exterior is a reddish-purple, the inside pale yellow changing to creamy white. Fragrant. Height 3 ft. Blooms July. Plant 5-6 inches deep on its side with a sunny location among very low shrubs. (Limited supply.)

Each \$1.25, 6 bulbs \$6.75, 12 bulbs \$12.50

OF HARDY LILIES

and New Varieties}

from May until October

Delivery Prepaid}

CALLOSUM—Callosum has a slender wiry stalk, bearing 10 to 20 recurved blossoms of an interesting shade of light salmon. This little lily isn't as outstanding as the larger lilies, but it is very dainty, and its numerous blossoms will blend with any flower in your garden. Height 2 to 3 ft. Blooms late July-August. Plant 4 inches deep.

6	12	25	50	100
\$1.65	\$3.00	\$5.70	\$10.90	\$21.20

CANDIDUM (Madonna Lily)—As I have said before, this is the lily our grandmothers loved and grew in their cottage gardens, and in spite of the popularity of the Regal lily, we still love the bell-shaped, pure white, dainty, fragrant Madonna. Unlike the other lilies, Candidum starts its growth early in the fall, producing a rosette of leaves during the winter—so plant this bulb **early** in a sunny location, apart from other lilies. Cover with no more than 2 inches of soil—poor location will do, but good garden soil preferred—and then let it alone. In spring, our experience has taught us, it is best to remove these fall grown leaves—they have served their purpose, and dying, are more apt to catch and transfer the brown leaf spot to the new spring foliage. Height 3-5 ft. Blooms June.

	6	12	25	50	100
7-8 in. cir.....	\$1.20	\$2.25	\$4.35	\$ 8.20	\$15.90
8-9 in. cir.....	1.80	3.25	6.25	11.95	23.00
9-10 in. cir.....	2.25	4.35	8.45	16.20	31.00
10-11 in. c'r.....	2.85	5.50	10.65	20.60	40.20
11-12 in. cir. (limited)....	4.50	8.50	16.65	32.80	64.10

(I probably can secure a very limited supply of 12 inches up. If interested, I'll be glad to quote you.)

CANADENSE—One of the best of the Northeastern American lilies. Graceful bell-shaped flowers on tall stems. Height 2 to 5 ft. Blooms June-July. Plant 6 to 8 inches deep. For some unaccountable reason the two types (Flavum, golden-yellow, and Rubrum, red spotted maroon) became mixed when planting, so I'm offering you the mixture at the price of Flavum and giving you first size bulbs.

6	12	25	50	100
\$1.75	\$3.35	\$6.45	\$12.50	\$24.10

FORMOSANUM
(See page 5)

CERNUUM—I am glad I can again offer you this little lily from Northeast China. It is quite dainty. The stems are slender and rigid with grass-like foliage. The color is lilac-pink, spotted wine color and delightfully fragrant. It grows 12 to 18 inches and blooms in June. The supply on the market is limited, so it would be well to place your orders early. Like so many of these small lilies, the bulbs are small, too, so plant it not more than 4 inches deep.

	6	12	25	50	100
Medium size	\$1.65	\$3.00	\$5.70	\$10.90	\$21.20
Larger size	2.10	4.00	7.70	14.80	28.60

CONCOLOR—Last year I mentioned a friend of mine who used this lily “rail-fence” style as a border all around her garden beds, and invited tea guests to see the display. The effect was delightful. Other customers have written they were pleased with this lily in a mass display. I’m going to lower my prices on this lily again, so you can purchase it in quantity. The height of this lily is 12-18 inches, and it holds its head right straight up. Blooms June. Plant 4 inches deep.

	6	12	25	50	100
	\$1.10	\$2.00	\$3.85	\$7.50	\$14.10

CORDATUM—A fine lily for the woodland, where it is worth cultivating for its foliage alone. In the early stages of its growth its leaves are stained a deep red, which in time changes to glossy green. Although it is distinct from *L. Giganteum* Him. and does not grow as tall, yet it should be treated similarly, planting it in partial shade (woodland for preference), so the top of the bulb is on a level with the surface. Cover in winter with bracken or old leaves, and it is best that it become established one year before it blooms. Height 4 to 5 ft. July flowering.

	6	12	25	50
	\$3.35	\$6.00	\$11.55	\$22.85

DAURICUM—The flowers of this lily are upright, varying from light orange to deep orange, flushed and spotted red. Height 1½ to 2 ft. Blooms May-June. Plant 5 inches deep in a sunny location with good drainage.

	6	12	25	50	100
4-6 inches	\$1.80	\$3.25	\$6.25	\$11.95	\$23.00

DAURICUM (Var. Luteum)—This is similar in type to the true Dauricum, but the color is a clear primrose yellow, spotted black. It is one of the finest of low growing lilies. Height 1½ to 2 feet. Blooms June. Plant 5 inches deep in sunny location with good drainage. I have a limited supply of these.

	6	12	25	
Flowering size	\$4.10	\$7.90	\$15.50	

DAURICUM (Var. Batemanniae)—This is an upright flowering lily of rich apricot and graceful recurving petals. Will grow in partial shade or full sunshine—does well in an ordinary garden. Height 2 ft. Blooms July-August. Plant 6 inches deep.

	6	12	25	50	100
4-6 in. cir.	\$1.80	\$3.25	\$6.25	\$11.95	\$23.00

ELEGANS—This group of lilies has large upright cup-shaped flowers, borne two to four on a stem, and they are adapted to rockery and border use, are excellent for cutting and are easily grown in pots. Plant 4 to 6 inches deep, sun or partial shade, in well drained soil. This list will give you a variety in shades of apricot on through light red to the very deepest blood-red.

Alice Wilson—Very large apricot flowers on low growing stalks. One of the best Elegans. Height 12 to 18 inches. Blooms June-July.

	6	12	25	50	100
4-6 in. cir.	\$2.00	\$3.65	\$7.00	\$13.55	\$26.25

Aureum—This Elegans is tall with lustrous dark green foliage and flowers of a deep apricot, spotted mahogany. This variety is excellent for cutting. It is one of the latest of these lilies to bloom, July-August. Height 2-3 ft.

	6	12	25	50	100
4-5 in. cir.	\$1.35	\$2.50	\$4.80	\$9.35	\$18.00

Atrosanguineum — A dark blood-red form, spotted black. Flowers slightly smaller than Alice Wilson but very striking. Height 15 to 18 in. Blooms June-July.

	6	12	25	50	100
4-6 in. cir.	\$2.00	\$3.65	\$7.00	\$13.55	\$26.25

Atropurpureum—Deep red shaded crimson, but not quite so dark a red as Atrosanguineum. Large flowers, splendid for bedding. Height 12 to 15 in. Blooms June.

	6	12	25	50	100
4-6 in. cir.	\$2.00	\$3.65	\$7.00	\$13.55	\$26.25

Incomparable—Its flowers are a deep mahogany-crimson. This is a dwarf variety, growing only about a foot high. Blooms June-July.

	6	12	25	50	100
4-6 in. cir.	\$1.85	\$3.50	\$6.75	\$13.00	\$25.00

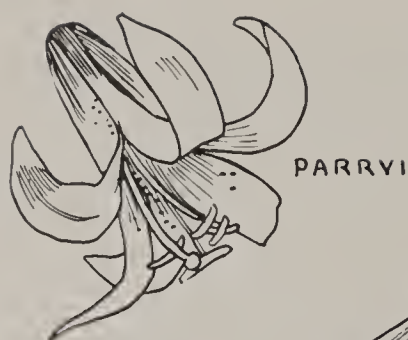

Red Improved—This variety of Elegans is light red—a terra-cotta red. It is also tall growing for an Elegans, about 2 ft. Blooms June-July.

	6	12	25	50	100
4-6 in. cir.	\$1.65	\$3.00	\$5.70	\$10.90	\$21.20

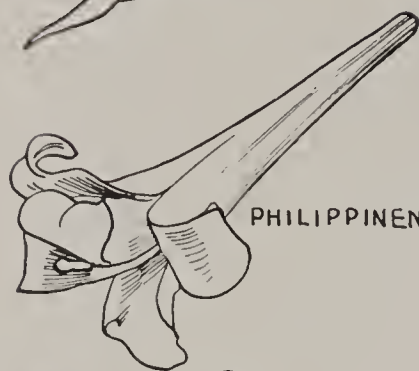

Mahony (Mahogany)—Very deep, dark crimson. Should be planted in partial shade. Height 12-18 inches. Blooms June. Plant 4-5 inches deep.

	6	12	25
	\$1.65	\$3.00	\$5.70

FORMOSANUM (Philippinense)—This lily has always been listed as “Philippinense” but lately has been ranked as one of the best of the lilies and its name changed. I have the same two varieties I had last year. See page 6. (Illustrated page 4.)

PARRYI

PHILIPPINENSE

REGALE

SHUKSAN

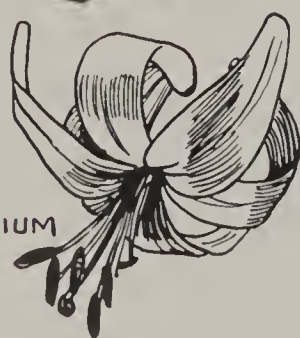

SUPERBUM

SULPHUREUM

SUNSET

TENUIFOLIUM

Early Blooming (Price's Variety)—Long white trumpet blossoms with a slight pink tinge to the ribs externally. It is slender, graceful, dainty, fragrant. Although the flowers are 6 to 8 inches long, the stalk seldom grows higher than 12 to 18 inches, so is an excellent rock garden lily, providing it is not too dry and windy—and is fine for the front of your border. Blooms August. Plant 4 to 6 inches deep.

	6	12	25	50	100
Nice sized bulbs.....	\$1.85	\$3.50	\$6.75	\$13.00	\$25.00

Late Blooming (Wilson's Variety)—This is a tall lily for this variety, growing 2 to 3 ft., with long slender white trumpet blossoms, exterior ribs tinged pink. I highly recommend this for your garden, providing the frosts do not come too early. It blooms late September-October.

	6	12	25	50	100
Nice sized bulbs.....	\$2.00	\$3.65	\$7.00	\$13.55	\$26.25

GIGANTEUM HIMALAICUM—A giant among lilies. Under ordinarily favorable conditions, the spikes have grown 10 to 12 ft. The foliage is broad and dense in keeping with the height of the plant. The many flowers are tubular shaped, pure white tinged with purple inside and it loves the rich humus soil of a woodland where it will have plenty of shade away from the direct rays of the sun. A northern exposure protected from strong winds, or the shade of trees will suit it. It is best that this lily become established one year before it blooms in order to make new bulbs. This is its method of perpetuating itself, therefore I am sending the size bulbs that will give correct growth for this lily. Plant shallow, barely covering the top of the bulb with soil. June blooming. (Very limited supply.)

Each \$2.15, 3 bulbs \$6.25, 6 bulbs \$12.25, 12 bulbs \$23.75

GRAYI—This is a native lily of Virginia and North Carolina. Somewhat resembles Canadense but with smaller funnel shaped orange-red blossoms densely spotted with brownish-purple. Blooms July. Plant 4 inches deep in a well drained soil, partial shade or fullsunshine. Height 2 to 4 ft. The bulbs I am shipping are grown in our gardens.

	6	12	25	50	100
Good strong flowering sized bulbs	\$2.75	\$5.35	\$10.45	\$20.05	\$38.00

HANSONI—Of all the lilies, this is probably one of the hardiest and most disease proof lilies in existence, and although it is not my favorite, yet the longer I grow it the better I like these thick petaled golden yellow nodding flowers in my garden. It is at its best in even more than half shade for its flowers. Height 3 to 4 ft. Blooms June. Plant 6 to 8 in. deep.

	6	12	25	50	100
6-7 in. cir.....	\$2.25	\$4.35	\$8.45	\$16.20	\$31.00
7-8 in. cir.....	3.10	6.00	11.75	23.00	44.95
8-9 in. cir.....	3.95	7.65	14.85	29.10	56.10
9-10 in. cir.....	4.50	8.75	17.10	33.85	66.00

HENRYI (The Golden Speciosum)—The blossoms of this lily are a soft golden yellow with a tinge of light green through the center. It is excellent for bouquets, opens readily in water from the largest to the tiniest bud, loves shades to intensify the golden yellow, and is not disturbed by mice. Your garden is not complete without a few Henryi. (Please remember that these are Oregon grown bulbs.) Height 5 to 9 ft. Blooms August-September. Plant 8 to 10 in. deep. (Illustrated page 9.)

	6	12	25	50	100
6-7 in. cir.....	\$1.25	\$2.35	\$4.50	\$ 8.50	\$16.15
7-8 in. cir.....	1.50	2.85	5.40	10.40	20.00
8-9 in. cir.....	2.10	4.00	7.70	14.80	28.60
9-10 in. cir.....	2.50	4.85	9.35	18.40	35.95
10-11 in. cir.....	3.35	6.00	11.55	22.85	44.70
11-12 in. cir.....	4.15	8.15	15.80	30.90	60.15
12 in. up (limited supply) .	5.65	10.85	20.95	41.10

JAPONICUM—One of the few pink lilies in cultivation. This is an exquisite trumpet-shaped lily varying from pale to deep pink, 6 inches or more in length, and fragrant. It grows 2 to 4 ft. and is best planted in a location protected from strong winds with partial shade and sharp drainage. Blooms in July. Plant 6 to 8 inches deep.

	6	12	25	50	100
4-6 in. cir.....	\$2.25	\$4.35	\$8.45	\$16.20	\$31.00
6-8 in. cir.....	2.85	5.50	10.65	20.60	40.20

LONGIFLORUM albo Marginatum—An unusual variety of Longiflorum, with bluish-green leaves set off with wide white margin, flowers purest white with gold anthers. This has not proved hardy in New England winters, but did you every try potting such lilies? Put them in a cool basement where they won't freeze and not too dry, then plunge pot and all in your garden when the winter is over. This has two advantages—you can "plant" the pot where you need a pure white lily, and you can remove it when the flowers are past blooming. For the south, out of doors, set the bulbs 6 to 8 inches deep in a warm sunny location. Height 15 to 18 inches. Blooms in July. (Very limited supply.)

	Each	6	12
5-6 in. cir.	\$.65	\$3.70	\$6.50

MARTAGON—This is the purple Martagon—of easy culture in either sun or shade, but like some of the other lilies, it requires a year to establish itself. The stem carries a number of waxy light purple flowers, spotted with deep purple. Height 3-4 ft. June-July flowering. Plant 3-4 in. deep. (Limited supply.)

	6	12	25	50	100
Flowering size	\$2.85	\$5.50	\$10.65	\$20.60	\$40.20

TESTACEUM

TIGRINUM SPLENDENS

TIGRINUM FLORE PLENO

UMBELLATUM SPLENDIDUM

VERMILION BRILLIANT

WASHINGTONIANUM

WILLMOTTIAE

MEDEOLOIDES—This lily is hardy and easily grown in a partially shaded situation. The flowers vary in color from apricot to scarlet with black spots. Grows from 12 to 18 in. high. Plant 3 to 5 in. deep in soil containing an abundance of leaf mold and with good drainage. Blooms June-July.

	6	12	25	50	100
Flowering size bulbs	\$2.60	\$5.00	\$9.85	\$19.50	\$37.95

PHILADELPHICUM—This lily grows in the northeastern states and Canada. It is brilliantly colored with scarlet, center yellow, dotted maroon, cup-shaped flowers. It should be planted in a woodland, partly shady, good drainage—some protection from heavy winter rains. Flowers June-July. Plant 5 in. deep. These bulbs are grown here in our Oregon gardens.

	6	12	25	50	100
Flowering size bulbs	\$1.65	\$3.00	\$5.70	\$10.90	\$21.20

RUBELLUM—A very lovely light pink trumpet shaped lily, fragrant and very early blooming. A splendid lily for rock gardens and cool greenhouse. It prefers considerable shade. Height 12-18 in. Blooms May-June. Plant 4 to 6 in. deep.

	6	12	25	50	100
Medium bulbs	\$2.10	\$4.00	\$7.70	\$14.80	\$28.60
Large bulbs	2.75	5.35	10.45	20.05	38.00

REGALE (The Regal Lily)—If you haven't planted this lily in your garden, your garden is missing a very beautiful flower, and if you have a few of them in your garden, why not plant more? This is easily the most popular lily that grows. Large white bell-shaped flowers with deep golden throat and pink midribs. Blooms June-July. Height 3 to 8 ft. Plant 6 to 8 in. I have very fine firm bulbs with excellent roots. For the first time I'm offering a small sized bulb of this variety. The roots and the bulb is just as firm and good as the larger sizes, but it takes longer to grow the height and the number of flowers of the larger bulbs. (See front cover.)

	6	12	25	50	100
5-6 in. cir.	\$1.10	\$2.00	\$3.85	\$ 7.50	\$14.10
6-8 in. cir.	1.35	2.50	4.75	9.10	17.35
8-10 in. cir.	1.85	3.50	6.75	13.00	25.00
10-11 in. cir.	2.85	5.50	10.65	20.60	40.20
11-12 in. cir.	4.15	8.00	15.75	29.90	58.75

SHUKSAN—This is one of the Dr. Griffith new hybrids that has made a name for itself and is now established in our gardens. The flowers are a yellow background with maroon spots and are beautiful for cutting, growing 3 to 5 ft. high. I'm very fond of this lily. Blooms July-Aug. Plant 8 in. deep.

	Each	6	12
Medium bulbs	\$1.25	\$6.45	\$12.50
Excellent bulbs	1.50	7.75	15.00

SULPHUREUM—This is a coming lily. You really should have it in your garden. It has large sulphur-yellow blossoms, blooms late in the season when we need a trumpet lily, and is daintily fragrant. In severe climates, Sulphureum should be protected with a heavy mulch. It grows 4 to 5 ft. Blooms Aug.-Sept. Plant 8 to 10 in. deep. I can give you good fresh Oregon grown bulbs. (See back cover.)

	Each	6	12	25	50
6-7 in. cir.	\$.50	\$2.60	\$5.00	\$ 9.85	\$19.50
7-8 in. cir.75	3.90	7.50	14.50	28.00

HENRYI
(See Page 7)

SUNSET (*Pardalium Giganteum*) — This magnificent red lily (see colored illustration) is the finest red lily yet offered for your garden. I'm sorry I cannot show you the sturdy stalks and heavy green foliage. It grows 5 to 8 ft. high, blooms July-August, has luxuriant foliage, is extremely hardy, easy to grow and is crowned with many beautiful blossoms. It thrives in sun or partial shade, likes plenty of water and good drainage, and as a background for your other lilies, or in your border, it has no superior. The clear scarlet of this lily blends well with the softer tones of the yellow in its throat. I still hope that some day the Sunset lily and the Regal will be growing in every garden from Atlantic to Pacific. Blooms July. Plant 8 to 10 in. deep. (Illustrated page 12.)

	Each	6	12	25	50	100
1 Crown	\$.50	\$2.60	\$5.00	\$9.85	\$19.50	\$37.95
2 Crown75	3.90	7.50	14.50	28.00	54.90
3 Crown	1.00	5.50	10.00	19.00	36.90	72.30

SPECIOSUM RUBRUM (See back cover)—This is one of our latest lilies to bloom and one of the sweetest, with a white background, numerous pink dots and shading of pink to carmine. Partial shade enhances the tone of the flowers. Grows 3 to 5 ft. Blooms September. Plant 6-10 in. deep. The bulbs I ship you are Oregon grown and are nice firm bulbs with roots.

	6	12	25	50	100
7-8 in. cir.	\$1.85	\$3.50	\$6.75	\$13.00	\$25.00
8-9 in. cir.	2.20	4.35	8.45	16.20	31.00
9-10 in. cir.	2.60	5.00	9.85	19.50	37.95
10-11 in. cir.	3.50	6.50	12.70	24.90	48.10

SPECIOSUM ALBUM—This is the pure white form of Speciosum, fragrant and very dainty. Could there be anything prettier than a large clump of the pink or rose dotted Speciosum (Rubrum) and a large clump of the pure white Speciosum (Album) and in the background the yellow Speciosum (as I love to call the Henryi)? I'm sure you'd love it. Same date of blooming and depth of planting as Speciosum Rubrum.

	6	12	25	50	100
6-7 in. cir.	\$2.25	\$4.40	\$8.35	\$16.30	\$31.90
7-8 in. cir.	3.05	5.95	11.60	22.85	44.85
8-9 in. cir. (limited supply)	3.85	7.65	14.85	29.10	56.10

SUPERBUM—This is an Eastern American lily, but we have grown them in our fields under good cultivation, so can offer you nice bulbs. This is a tall vigorous plant with many recurving yellow blooms spotted maroon, orange and crimson. Grows 4 to 5 ft. Blooms July-August. Plant 4 in. deep, partial shade.

	6	12	25	50	100
Medium sized bulbs	\$1.50	\$2.85	\$5.40	\$10.40	\$20.00
Large bulbs (give excellent bloom)	2.25	4.35	8.45	16.20	31.00

TENUIFOLIUM—"Gayest of little lilies." Bright cheery red blossoms, bringing into our gardens joy and gladness in May or early June. I am offering this again this year at a price to enable you to grow them in quantities. Height 1 to 2 ft. Plant 3 to 4 in. deep. We grow excellent bulbs—the large bulbs are the same age of the smaller bulbs—simply are larger and sturdier. (Illustrated page 14.)

	6	12	25	50	100
Medium size	\$1.00	\$1.85	\$3.45	\$ 6.50	\$12.10
Large bulbs	1.35	2.50	4.80	9.35	18.00

TENUIFOLIUM GOLDEN GLEAM—This lily resembles the Tenuifolium in everything except the color of its blossoms, and the blossom is just what the name implies, a GLEAM OF GOLD. Same height, same blossoming date, same planting depth. A mixture of the two colors would make a bright spot in your garden. I can offer these to you in lots of 100 this year.

	6	12	25	50	100
Medium size	\$1.35	\$2.50	\$4.80	\$ 9.35	\$18.00
Large bulbs	1.65	3.00	5.70	10.90	21.20

TIGRINUM SPLENDENS—You will remember last year that I mentioned I had a Tigrinum bulb in my private garden that had 16 stalks in 1936, after being planted four years, and in 1937 there were 22 sturdy stalks from that one bulb, each stalk bearing many flowers of dark spotted orange. It was as though nature had arranged a beautiful bouquet. Why don't you try Tigrinum as a specimen lily for fall blooming, here and there throughout your garden, or at the back of your border in front of a stone wall—or in some corner by itself—and then leave it alone. Height 4 to 5 ft. Plant 8 in. deep, sun or partial shade, well drained soil.

	6	12	25	50	100
Medium size bulbs	\$1.35	\$2.50	\$4.80	\$ 9.35	\$18.00
Excellent bulbs	1.85	3.50	6.75	13.00	25.00

TIGRINUM flore pleno—This is the only double lily I have. The word “lily” seems to associate itself in our minds with a single blossom, and we sometimes resent the thought of a double lily, but I think you will find this double lily an addition to your garden, not only because it is an attractive lily in itself, but it will prolong the “reign of the Tigers” after most of the other lilies are gone. It grows 3 to 5 ft. Blooms Aug.-Sept. Flore pleno does not make as large a bulb as Splendens, so plant 5 to 6 inches deep.

	6	12	25	50	100
	\$1.85	\$3.50	\$6.75	\$13.00	\$25.00

TESTACEUM (Nankeen)—This is an outstanding lily of soft apricot or yellow buff, whose demand far exceeds the supply. In some localities it demands extra care to grow it, but where one is successful, undisturbed clumps will give you a good bloom for years. It is the only lily of its color and truly worth the price. This lily puts forth a fall growth (under the ground) and should not be planted late. We ship in late August, and they should be planted at once, so please place your orders EARLY. Height 2 to 5 ft. Blooms June-July. Don't plant too deep—3 to 4 inches from base to top of soil.

	Each	6	12
6-7 in. cir.....	\$1.00	\$5.35	\$10.00
7-8 in. cir.....	1.50	7.75	15.00
8-9 in. cir.....	1.75	9.00	17.50

I may have a few size 9-10—write me if interested.

UMBELLATUM—The Umbellatum is very reliable, is early flowering, has many umbellate upright blossoms and a dignified sturdy growth that makes it very welcome in either your June garden, where it eventually sends forth many stalks. or for porch bouquets. Height 2-3 ft. Blooms May-June. Plant 4 to 6 inches deep in a sunny location. I can offer you two varieties of this lily :

Erectum—A very fine form producing large heads of bright red flowers.

	6	12	25	50	100
6-7 in. cir.	\$.90	\$1.50	\$2.75	\$5.30	\$10.00
7-8 in. cir.	1.00	1.85	3.50	6.75	13.00
8-9 in. cir.	1.35	2.45	4.60	8.80	17.00 .

Grandiflorum—Orange shading to red at tips.

	6	12	25	50	100
6-7 in. cir.	\$.95	\$1.70	\$3.25	\$6.25	\$11.95

8-9 in. cir.	1.35	2.50	4.80	9.35	18.00

WILLMOTTIAE—The many orange-yellow recurving blossoms of this lily are borne on a very graceful stem with long deep green foliage, and the little black dots scattered over its face enhance the yellow-orange coloring, so it seems to fairly **breathe** of life. Try these with Delphinium in a brass bowl. Height 2 to 4 ft. July-Aug. Plant 6 inches deep. (Illustrated page 15.)

SUNSET LILY (See page 9)

A GROUP OF SPECIAL LILIES

Native of the Western Coast

I have had requests from my customers for our western native lilies and although I have grown in my fields and offered for sale a few of these varieties in my former catalogues, this is the first time I have been able to offer so many varieties. Very favorable reports have come from some gardens on the success of the western natives I have offered before. Just how well they will make themselves at home in your locality and your garden, I cannot say, but this I do know, that these lilies are very sweet and worth the trying.

Give them well drained lime free soil, partial shade, and an abundance of leaf mold. Also send your orders early so they can be shipped you at the correct planting time and transplanted immediately. Delay in transplanting these bulbs even more so than some of the other lilies will cause them to mold and deteriorate.

BOLANDERI—Bell-shaped flowers varying from a brick red to a rich wine red. Grows 1 to 3 ft. Blooms July. Plant 5 to 6 in. deep.

	Each	6	12	25	50
Flowering size bulbs	\$.75	\$3.90	\$ 7.50	\$14.50	\$28.00
Large bulbs	1.00	5.50	10.00	19.00	36.25

COLUMBIANUM Ingrami—This is a turkseap lily with reflexed petals, golden yellow flowers spotted with purple. Grows 3-4 ft. Blooms June-July. Plant 5-6 in. deep.

	Each	6	12	25	50	100
Medium size bulbs	\$.25	\$1.35	\$2.50	\$4.80	\$ 9.35	\$18.00
Large bulbs45	2.10	4.00	7.70	14.80	28.60

HUMBOLDTII Magnificum—This is a lovely lily if you can be successful with it, as it is rather capricious. Flowers reddish-yellow spotted maroon. Will grow in a well drained soil, but prefers deep peaty soil in a moist atmosphere. Plant shallow.

	Each	6	12	25
Medium size bulb	\$1.00	\$5.50	\$10.00	\$19.00
Large	1.50	8.25	15.00	28.80

KELLOGGII—A pinkish purple with maroon spots and a yellow stripe through the center of each petal. Petals very much reflexed. Very fragrant. Plant in partial shade in a loose woodland soil. 5-6 in. deep. Height 2-3 ft. June-July blooming.

	Each	6	12
Medium size bulbs	\$.85	\$ 4.60	\$ 8.50
Large bulbs	1.25	6.75	12.50

MARITIMUM—This lily is rather difficult in cultivation, being a native of peaty meadows, it prefers moist peaty soil, in partial shade. It has grown well in rock gardens, however. The flowers are reddish-orange, spotted with purple—drooping, bell-shaped petals much reflexed. Slender growth. Ht. 3 ft. Blooms July.

	Each	6	12	25
Flowering bulbs	\$1.00	\$5.50	\$10.00	\$19.00

L. TENUIFOLIUM
(See page 10)

OCCIDENTALE—This lily is not difficult to establish under garden conditions. The flowers are bell-shaped, orange-red with a maroon spotted throat. Plant in lime free soil with peat or leaf mold. Height 2-4 ft. Blooms July. Plant 4-5 in. deep.

	Each	6	12	25
Flowering size bulbs	\$.75	\$3.90	\$7.50	\$14.50

PARRYI—This is a beautiful lily, easily cultivated but not very strong. If you can have success with it, you will love it dearly. The flowers are funnel shaped with the petal tips gracefully recurving. The color is lemon-yellow, lightly dotted brown, with a pleasing fragrance. It requires sharp drainage, well watered, partial shade, lime free soil. Height 3 to 5 ft. Blooms July. Plant 6-8 in. deep.

	Each	6	12	25
3-4 in. cir.	\$.75	\$3.90	\$ 7.50	\$14.50
4-5 in. cir.	1.00	5.50	10.00	19.00
5 in. up	1.25	6.75	12.50	24.00

ROEZLII—This is another turkseap lily with golden-yellow flowers shading to orange-red at the tips. As with all the other western natives, give them lime

L. WILLMOTTIAE
(See page 11)

free soil, good drainage, partial shade and moisture during the growing season. Height 3-5 ft. Blooms July. Plant 4-6 in. deep.

	Each	6	12	25	50	100
Medium bulbs	\$.40	\$2.00	\$3.65	\$7.00	\$13.55	\$26.25
Large bulbs50	2.60	5.00	9.85	19.50	37.95

WASHINGTONIANUM (Mt. Hood)—This is Oregon's beloved lily—dainty white bell-shaped blossoms that change to wine color with age. It may take two years before it makes itself at home in your garden, but it is so dainty and sweet, I'm sure you will agree with those who so patiently waited, and say, "It's worth it." Plant 8 to 10 in. deep.

	Each	6	12	25	50	100
Medium size	\$.45	\$2.10	\$4.00	\$7.70	\$14.80	\$28.60
Large bulbs65	3.35	6.00	11.55	22.85	44.70

In order that you may try out some of these western natives, I am giving you two trial orders, as follows:

ONE EACH of the 9 varieties for \$5.85 (value \$6.20)

SIX EACH of the 9 varieties for \$31.95 (value \$32.75)

HEMEROCALLIS

HEMEROCALLIS

(The New Day Lily)

Here are a dozen of the lovely new hybrid Day Lilies, which are so much in demand. Hemerocallis is a perennial, simple and easy to grow, pleasing, fragrant and harmonious in the garden—loves an abundance of water and good soil, yet will grow even on poor dry land, and makes itself at home in sun or shade. I seem unable to keep up with the demand without discontinuing some of the varieties for a year, to secure a supply. This year I bring you back some of those I had to discontinue last year, and some new varieties.

APRICOT — Light apricot-orange, early June blooming, semi-dwarf, about 2½ ft. Each 50c, 3 for \$1.40

CITRINA—Long, narrow, tubular bloom, pale lemon yellow; true night blooming variety; fragrant. Each \$1.00, 3 for \$2.50

FLAMID—Rich orange-yellow with brownish reverse. A very prolific bloomer. July flowering. Each \$1.00, 3 for \$2.00

- GEORGE YELD**—One of the loveliest—difficult to describe, as it is a blending of buff, apricot and terra-cotta. A very outstanding variety. Blooms August. **Each \$2.00, 3 for \$5.00**
- J. A. CRAWFORD**—Bright yellow with apricot tints. One of the best. Grows 4 ft. June-July blooming. **Each \$1.00, 3 for \$2.75**
- J. R. MANN**—Distinctive flower of frosted apricot, blooming in July and August, 3½ ft. tall. **Each \$1.00, 3 for \$2.50**
- LUTEOLA**—A very free flowering and easy growing variety. deep orange-yellow, blooming throughout mid-summer. **Each 75c, 3 for \$2.00**
- MARGARET PERRY**—Bold masses of branching stems bearing a profusion of large orange flowers with throat and stripes of cadmium-yellow. Award of Merit, R. H. S. Grows 4 ft. July-August blooming. **Each \$2.50, 3 for \$6.50**
- MRS. A. H. AUSTIN**—Extra fine deep golden-orange, one of the very largest. Mid-summer, lasting over a long period. **Each \$1.00, 3 for \$2.50**
- MIKADO**—Bright orange, blotched ruddy purple-red. A very striking and unusual variety. **Each \$2.50, 3 for \$6.50**
- MRS. W. H. WYMAN**—A lovely glistening pale lemon-yellow, with delicately curved petals. The latest of all. **Each 75c, 3 for \$2.00**
- ROSEA**—Beautiful old rose shading to golden yellow center. Medium height. Midseason. **Each \$3.50, 3 for \$9.00**
- THUNBERGII**—This is an evening blooming Day Lily and sweetly fragrant—clear buttercup-yellow. Late blooming. 4 ft. tall. **Each 50c, 3 for \$1.40**

MISCELLANEOUS BULBS

I was so delighted with the coloring and charm of some of these dainty little bulbous flowers, resembling the lilies close enough to be first cousins, that I asked one of our western growers if he wouldn't allow me to offer a few varieties to my customers—and here they are:

NOTES—Cultural directions sent with orders. Blooming period late March to early May. Bulbs to be shipped from late September to late October. Place your orders early, please, to insure prompt delivery. No shipments made for less than 6 of each variety, except as listed in "Collections for Small Gardens." (Separate sheet enclosed.)

CALOCHORTUS (Kal-o-kort'-us)—These bulbs are natives of woodlands, delighting in loose soil and liking leaf-mold and a light shade. They will also do well in heavy soils, and naturalized among rocks or in shaded woods, but be sure they have good drainage. Plant them just before the ground starts to freeze.

	6	12	100
Albus —Pure white, many flowers	\$.30	\$.50	\$3.50
Amabilis —Rich yellow, grows 15 inches high.....	.40	.70	4.75
Amoenus —Soft rose-pink, grows 8 inches high.....	.40	.70	4.75
Benthamii —Bright yellow, grows 3-8 inches high.....	.30	.60	3.50
Lilacinus —Lilac, fragrant, handsome, quite hardy, grows in meadows moist until after flowering season, not a woodland plant30	.50	3.50
Maweanus Major —White with soft lavender hairs, thick on inner surface30	.50	3.50

Special Offer—
 6 each of the 6 varieties (36 bulbs, value \$2.00) for.....\$1.75
 12 each of the 6 varieties (72 bulbs, value 3.40) for..... 3.05

1. Anne R. Webb, Garden City, Long Island, New York.
2. Mrs. Albert Herter, East Hampton, New York.
3. A. E. Martenson, Lindstrom, Minnesota.
4. Mrs. M. W. Faitoute, Twin Oaks, Short Hills, New Jersey.
5. Mrs. H. V. R. Kennedy, The Three Oaks, Hempstead, Long Island, New York.

*Three views
of my lily fields
in which
your bulbs are
growing
under ideal
conditions,
with
experienced
care.*

CAMASSIA (Ka-mass'-si-a)—These bulbs are hardy without protection anywhere. You can plant them in your garden or in open moist woods or along your streams or ponds. Best to plant them about 4 inches apart, 3-4 inches deep in masses of a dozen or twelve dozen or more. They can be left alone for years.

Leichtlinii—I can give you this variety of Camassia in either blue or white. The flowers are star shaped on a three foot stem, as many as a hundred buds sometimes to a stem. The white blooms 2 or 3 weeks later than the blue. Please state which color you wish.

	6	12	100
Medium bulbs	\$.35	\$.65	\$4.65
Large bulbs50	.95	8.00

Quamash—This is a royal blue—rich in color and grows two feet when at its best. When planted in masses of a hundred or more, they are very showy.....

Special Offer—			
6 each of the 3 varieties (18 bulbs, value \$1.00) for.....			\$0.85
12 each of the 3 varieties (36 bulbs, value 1.80) for.....			1.55

ERYTHRONIUM (Er-i-throh'-ni-um)—Dog's Tooth Violets. Lovely little woodland plants, in delicate tints of cream, yellow, pink, white, lavender and purple. Very hardy. They love a loose gritty soil, rich in leaf mold, but also thrive in clays, grits and rock soils, and naturalize in great number in open meadows or woodlands of a moist, shady position, if well drained. Try these among your ferns. Some of these western species are 3 to 5 inches across with stems 4 to 6 inches, even 12 inches.

Californicum—Large cream colored flowers, leaves richly mottled

Californicum Bicolor—Outer half of petals pure white, inner bright chrome-yellow

Grandiflorum—Bright buttercup-yellow

Hartweggii—Yellow, very early, stands heat.....

Hendersonii—Lovely light purple, center deep maroon, very striking

Revolutum—Large flowers in delicate blending shades of white tinted lavender; deep lavender-pink; pink; hardly two alike—all lovely

Revolutum Pink Beauty—Deep lavender pink, a lovely Erythronium

Revolutum Johnsonii—Exquisite rose-pink flowers, one of the prettiest

	.60	1.15	7.85
Special Offer—			
6 each of the 8 varieties (48 bulbs, value \$3.65) for.....			\$3.15
12 each of the 8 varieties (96 bulbs, value 6.70) for.....			6.00

I can secure you a smaller size for naturalizing in orders of 300 and more. Please write me if interested.

FRITILLARIA (Frit-ill-ar'-ia)—These bulbous plants of the west coast are to me the most fascinating of all. They are lovely in woodland or border, excellent for cutting either by themselves or with other flowers. But they do have a habit of resting for a year after flowering. The bulbs I shall send you I hope all will flower the first year, but if some of them do not, as I cannot tell for sure, please don't disturb them. Plant 3 to 4 inches apart, 3 inches deep. (Continued on page 22.)

FRITILLARIAS

1 and 4, *Lanceolata*. 2, *Recurva*. 3, *Pudica*. 5, *Biflora*. 6, *Pluriflora*. 7, *Purdyi*, varied form.

Lanceolata —Green and brown, mottled prettily. Hardy, prefers woodland with a porous, well drained soil, fairly rich in leaf mold. 1½ to 3 feet high.....	6	12	100
	\$.55	\$1.00	\$7.50
Pluriflora —Large open bells of a lovely deep rose. Instead of woodland, plant in full sun in loam or clay soils, well drained. 6-12 inches high.70	1.25	8.50
Pudica —Nodding bell flowers of pure gold. Very hardy, a gem for the rock garden. 4-6 inches high.....	.65	1.15	8.00
Recurva —Orange-scarlet, throat flecked with yellow. This is considered one of the finest Fritillarias in existence. It prefers woodland with a porous, well drained soil fairly rich in leaf mold. Grows 1½ to 3 feet high.....	.70	1.25	8.50
Thunbergii —This is not a native west coast Fritillaria, but originally came from Japan woodlands. We are now growing it in our commercial fields. The slender leaf with its curlycue on the end, together with its many “morning green” bell shaped flowers, gives it a sprightly butterfly appearance. Plant in woodland, leafy soil or partial shade in mass for best effect.....	1.35	2.50	15.85

Special Offer—

6 each of the 5 varieties (30 bulbs, value \$3.35) for.....	\$2.95
12 each of the 5 varieties (60 bulbs, value 6.00) for.....	5.35

Matilija

(Pronounce the “ja”
like “ha”.)

The scientific name of this plant is *Romneya Couteri*. It grows five to eight feet high, producing a continuous growth of numerous beautiful white flowers with orange center, 5 to 6 inches across, delicate, transparent and delightfully fragrant. It blooms from August until frost and is a wonderful cut flower, keeping in excellent condition for two weeks if the water is changed daily.

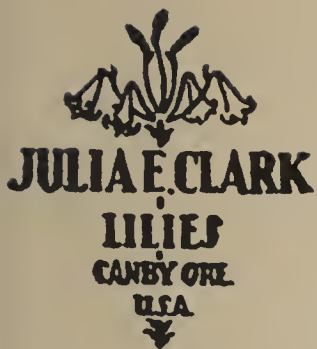

This perennial plant dies down each fall, reappearing in the spring, same as other perennials. It is perfectly

hardy except in states north of Philadelphia, where it should be mulched.

Matilija starts its growth, putting forth new shoots under the ground as early as January and February. These little shoots are very tender and if disturbed will destroy the plant, so I am able to ship Matilija only in the fall. I can give you good strong roots of this plant for \$1.00 each, 3 plants for \$2.75.

MATILIJA

A Few General Rules of Lily Culture

Plant lily bulbs upon arrival—they resent being moved and they deteriorate the longer they are out of the ground.

Best location, southeast exposure, in warm, sheltered, half shady place.

Protect from late frosts, extreme heat of sun, and drought.

Soil mellow, deep leaf mold, peat and loam, WELL DRAINED (soil through which water seeps without standing near the bulb).

Depth: General rule, soil above bulb about $1\frac{1}{2}$ to 2 times size of bulbs. See catalogue description each lily for depth from base of bulb to top of soil.

Best fertilizer is bonemeal.

Dust powdered sulphur to keep insects from attacking bulbs until bulb is established and has sufficient strength to resist such attacks.

Keep them moist during growing period.

Many of the lilies have stem roots within an inch of the surface, and spreading out from the bulb 6 to 8 inches. These roots nourish the stalk—the stalk helps nourish the bulb for the next season, so don't disturb these roots with cultivation—keep them cool and moist with mulch.

Do not allow seed pods to form—they sap the strength for next season.

Watch for gophers, field mice, and ground squirrels—they like bulbs.

If used for cutting, leave at least 6 to 8 inches of stalk as nourishment for next year's bloom.

Fall planting of bulbs is best, although a few of the varieties can be planted in the spring. If planted in the fall, they can establish themselves without being disturbed.

After once planted, leave the bulbs alone. Do not move them every year.

Do not plant home grown lily bulbs in soil where foreign bulbs of any kind have been grown.

If the soil is stiff strong clay, dig hole 24 inches square and deep. Put in 6 inches of broken gravel, crushed flower pots, etc. Then chopped sod (grass face downward). Then six inches of top soil mixed with compost, broken up well with sand, and several handfull bonemeal. Firm down well. Then top soil to depth for bulb. Then plant bulb per above. For a scaly bulb, hold scales together. Fill in with good mellow soil well wetted down. Then, **LEAVE THEM ALONE.**

In dry soils, sink drain pipes vertically into the ground among the bulbs to depth where water can come into immediate contact with the roots at the base of the bulb.

JULIA E. CLARK,
Canby, Oregon.

Collections for Small Gardens

LILY COLLECTION No. 1—This is my selection for an amateur's garden:

Tenuifolium—A gay little lily blooming in May.

Golden Gleam—To bloom with Tenuifolium.

Amabile—Follows upon the heels of Tenuifolium.

Regal—White, requires little care and gets bigger and better each season.

Willmottiae—Adds color in midsummer.

Tigrinum—A fall bouquet.

Two each of the above for \$2.00 postpaid.

You will be pleased with these.

JULIA E. CLARK
Canby, Oregon

LILY COLLECTION No. 2—Amabile, Concolor, Callosum, Golden Gleam, Henryi, Regal, Tenuifolium, Umbellatum, Tigrinum, Willmottiae.

Two each of the above ten varieties for \$3.25

Two each of any six your choice \$2.00

If you will leave the choice of lily bulbs entirely to me, I will give you bulbs to the value of \$ 7.50 for your check for \$ 5.00 or bulbs to the value of \$13.00 for your check for \$10.00

If you wish you may mark below your preference, and I will be guided by it as near as I can:

1. I prefer mostly white lilies;
2. I prefer mostly red lilies;
3. I prefer various colors.

HEMEROCALLIS COLLECTION—A lengthy season of finest bloom can be obtained with: **Apricot**, early June; **J. A. Crawford**, June-July; **Luteola**, throughout the summer; **Mrs. W. H. Wyman**, latest of all.

One each \$2.75. Two each \$5.25

MISCELLANEOUS BULBS COLLECTION

6 Varieties Calochortus, 3 Varieties Camassia, 8 Varieties Erythronium and 5 Varieties Fritillaria.

One bulb of each variety (22 bulbs not labeled) \$2.00

Three bulbs of each variety (66 bulbs labeled) \$5.25

OREGON GIANT PANSY SEED

New season's seed—1 Packet (600 seed).....\$1.00

New season's seed—3 Packet (600 seed each)..... 2.00

ITEMS OF IMPORTANCE

Every bulb I sell is grown here on the western coast, and I try to grow, or secure for you in this vicinity, the very best bulbs possible to grow. I cannot guarantee them to grow in your garden, as your climate or your soil may not be suited to every variety I list, but I'm sure some of these varieties can be a success in your garden, and they are worth your trying. I guarantee all bulbs to be true to name and to reach you in good healthy condition. If there is any complaint, please make same upon receipt of shipment.

Every bulb I offer, even "flowering size" has already bloomed or budded to bloom (see *Giganteum Him.* and *Cordatum* for exception). I do not sell the blossoms but disbud to allow the strength of the stalk to return to the bulb for blooming next season.

I ship the bulbs at the proper planting time. Sometimes this necessitates two and even three shipments to an order, which is an additional expense to me, but it guarantees you fresh bulbs. Lilies grow dormant **in the ground**, and should not lie **out of the ground** longer than possible, so please place your orders early and I will ship them direct from the field at the proper planting time. If you will be away from home, won't you please leave instructions for their planting, as I, too, am anxious that you have success.

I do not want to become a nuisance in repeating over and over, "Plant your lily bulbs upon arrival," but it is so important for the sake of the future of the lily that it does not lie out of the ground long.

Candidum, Testaceum and Muscari are dormant in late July or early August, according to the season. Please place your orders early—we ship in August. If you will be away from home, please leave instructions for some one to plant them upon arrival.

I am not listing Muscari this year, but I have a very limited supply of exceptionally large bulbs. If interested, I'll be glad to quote you.

Last year a number of the garden clubs took advantage of my special offer to garden clubs. If six or more of your members are interested, I'll be glad to make you this year's offer.

When I say "Medium size bulbs" and "Large bulbs" it refers to the size of that variety of lily.

All shipments are prepaid to destination. If your express office is different from your postal station, kindly give both with your order.

General rules of culture will be sent with each shipment.

Please do not ask me to make shipments of any order for less than \$2.00. (Pansy seed an exception.)

If you are not already a customer, kindly send check with order.

I have tried to send you a catalogue that is attractive, but you will be just as pleased with the **bulbs** when you receive them.
